0700-0469

Case Title:

Jacam Chemicals LLC

Reporting Office:

Kansas City, KS, Area Office

Subject of Report:

Report of Surveillance at the Jacam Production Facility and Injection Well Site

Activity Date:

August 1, 2013

Reporting Official and Date:

(b) (6), (b) (7)(C)

Special Agent

05-AUG-2013, Signed by: (b) (6), (b) (7)

Approving Official and Date:

(b) (6), (b) (7)(C)

Special Agent in Charge

08-AUG-2013, Approved by: (b) (6), (b) (7)(C)

SYNOPSIS

SA (b) (6), (b) (7)(C) conducted surveillance at the Jacam production facility and nearby injection well site. SA (b) (6), (b) (7)(C) observed tire tracks in the mud at the injection well site that Jacam had used in the past to dispose of waste. SA (b) (6), (b) (7)(C) did not observe any vehicles injecting material into the well.

DETAILS

On August 1, 2013 at 9:45am, SA (b) (6), (b) (7)(C) arrived at the injection well site at Plum and Avenue Q in Rice County, Kansas. The ground was muddy and it appeared that the region had experienced localized flooding. SA (b) (6), (b) (7)(C) drove to the injection well and observed there were tire tracks which led over the berm which surrounds the well. The tracks were located in mud and on the same area of the berm where the Jacam trucks had been previously observed driving over the berm to access the well. The previous observations were made via video surveillance.

SA (b) (6), (b) (7)(C) left the injection well site and drove to the Jacam production facility near Highway 14 and Avenue Q to the south of Lyons, Kansas. SA (b) (6), (b) (7)(C) arrived at 10:10am at Jacam and observed a white crew cab pickup truck with a flat bed on the property. The flat bed of the truck was empty. A vehicle similar to this one was seen on the video surveillance at the injection well site with bulk tote storage containers on it. SA (b) (6), (b) (7)(C) surveilled the Jacam facility until 12:00pm, at which time he returned to the injection well site.

SA (b) (6), (b) (7)(C) conducted surveillance at the injection well site until 2:45pm. During the surveillance, SA (b) (6), (b) (7)(C) did not observe any vehicle injecting material at the well site.
